

MODULAR WINDOW SIGNS - WITH AN AM SERIES HEADER

2 SYSTEMS USED AS ONE

The AM Series and the Modular Window Sign Series can be combined to make another range of signage.

An AM Series header can be combined with a Modular Window Sign via the use of an aluminum plate.

HOW IT WORKS

The 2 systems can be used together, by simply assembling the 2 units with an aluminum panel on the reverse side.

This is only assembled in house by Systech. This allows for varying degrees of interchangeability within the sign.

Both systems can be used alone if required.

SIZES

For a range of configurations and options please refer to the size chart.
