

MODULAR WINDOW SIGN SERIES

HOW TO OPERATE

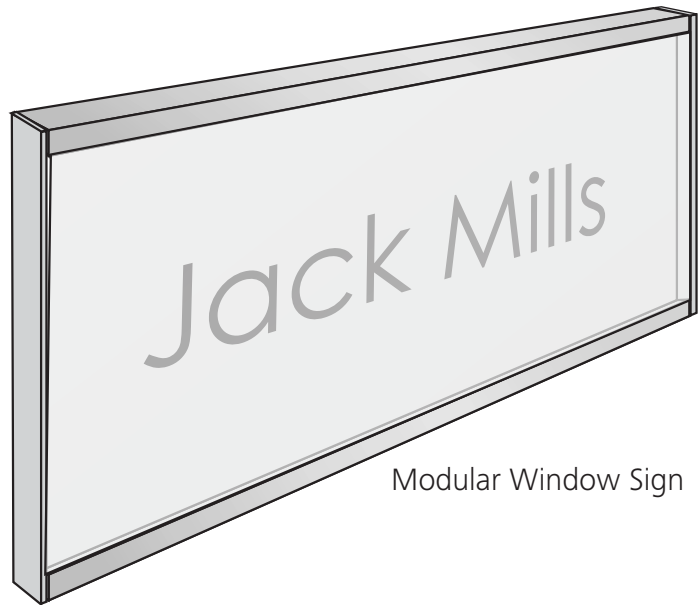

PAPER INSERT SIGNS

The Modular Window Sign consists of an aluminum backing panel, a clear non-glare acrylic face and flexible End Caps.

The sign accepts paper or acetate/lexan inserts that slide in behind the acrylic face.

Specially designed flexible End Caps secure the contents.

The Modular Window Sign is available in various sizes, with or without an AM Series Header and or Footer.

Modular Window Sign

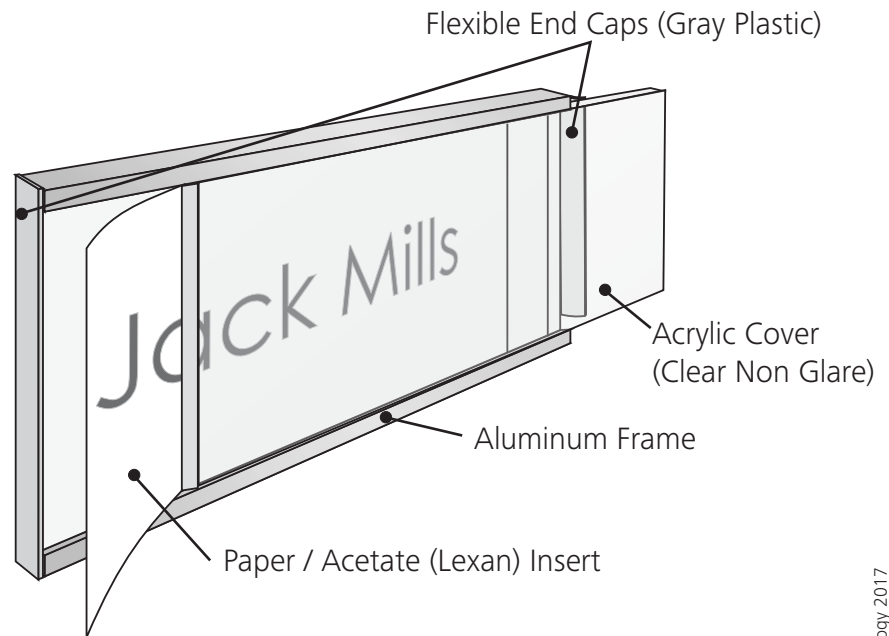

The Modular Window Sign is Side Opening in all cases, regardless of size or orientation.

HOW TO OPERATE

Simply slide the acrylic to one side, the End Cap will automatically flex open allowing access to the contents.

Don't remove the acrylic from the frame, it is not designed to be removed. Sliding it half way out of the frame is sufficient.

Change the paper and slide the acrylic back to its closed position.

SIZES

Smallest Size: 4 1/8" W X 2 7/16" H.

Largest Size: 8 1/2" X 11" - Portrait and Landscape.

A range of sizes are available, see Page L3 for Size Chart.

For sizes larger than 8 1/2" X 11", please refer to the Poster Holder in Section K of this document.

PLEASE NOTE:

Modular Window Signs are suitable for interior use only.
