PAPER HANGER SERIES

Based on the "gravity" principle, the Paper Hanger Series utilizes an exterior aluminum extrusion with internal rods that grip and hang paper for display purposes.

The Paper Hanger Series is ideal for notes, messages, architectural plans, displays, posters or boardroom presentations.

It can be installed using double stick foam tape directly to a wall, cubicle screen or any other flat surface.

Choose your required length. Systech will cut it to size.

The maximum length is 74"
The Smallest Size is 4"

Registered Design

HOW TO OPERATE

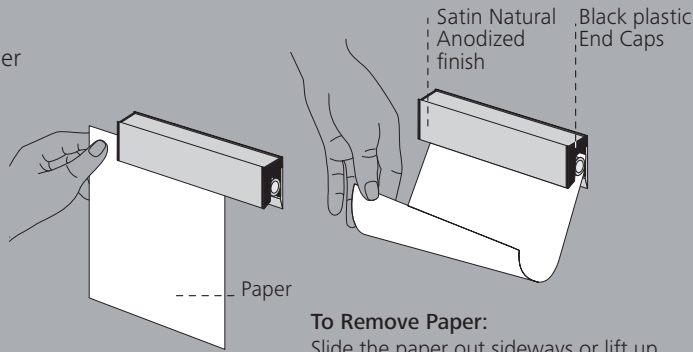

Paper is easily inserted behind the Paper Hanger's aluminum rods and is gripped in place through gravity and the grooved surface within the extrusion.

To remove, take the bottom of the paper and lift it up and away from the wall or substrate.

Alternatively, slide the paper out sideways to the left or the right.

It is designed to accept a single piece of paper. However, you can sit sheets of paper side by side.

The Paper Hanger can also be used with the Architectural Modular Series sign system. The Paper Hangers 13/16" high extrusion allows for it to be simply attached to the AM Series 13/16" high Insert with the use of double stick tape.

To Remove Paper:

Slide the paper out sideways or lift up towards you to release

SIZES

The Paper Hanger Series is available in lengths up to 74" and can be cut to any size. Longer lengths can be achieved by removing the End Caps and butt-joining 2 or more lengths together.

End Caps are required on the extreme left and right ends of the Paper Hanger.

FINISH

The standard finish is Satin Natural Anodized Aluminum.

The End Caps are black plastic.

INSTALLATION

The Paper Hanger can be installed with double stick foam tape.

POSSIBLE USES

- Staff notices
- Messages
- Schedules
- Notes
- Opening hours
- Architectural Plans
- Hospital / Patient Identification
- Instructions
- Menus
- Price lists
- Phone extension list

Insert paper side by side

Attached it to the AM Series
